

Explore What happens during photosynthesis?**Materials**

elodea
plastic cup
water
hand lens
flashlight

What to Do

- 1 Place a piece of elodea in a cup filled with water.
- 2 Turn on a flashlight. Place it next to the cup so the light is shining on the plant.
- 3 Observe your plant for several minutes.
- 4 Draw or describe what you observe.

Explain Your Results

1. What change do you observe in the elodea plants?
2. Explain why these bubbles appear.
